## IB-0041 | Arum

Wall art

Illuminated calla-lily wall

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0042 | Mayura

Wall art

Peacock botanical relief

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0043 | Cadence

Wall art

Architectural rhythm wall

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

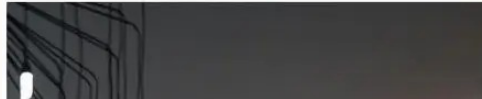

## IB-0044 | Ashva

Wall art

14401

THICKNES

Seven-horse relief panel

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0045 | Vriksha

Wall art

Tree-of-life feature wall

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0046 | Ginkgo

Wall art

Five-leaf fan-rib composition

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0047 | Zephyr

Wall art

Wind-swept leaf and wake-line relief

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0048 | Eira

Wall art

Concentric botanical rosette

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0049 | Morrow

Wall art

Branch and crescent relief artwork

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0050 | Sonnet

Wall art

Four-band botanical composition

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0155 | Flora

Wall art

Five-blossom magnolia branch

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0156 | Avian

Wall art

Three abstract birds in flight

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0157 | Coral

Wall art

Organic branching coral

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0158 | Koi

Wall art

Circling koi composition

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0159 | Luna

Wall art

Seven moon phases

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0160 | Rain

Wall art

Descending droplet trails

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0161 | Bloom

Wall art

Six-layer dahlia relief

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0162 | Fable

Wall art

Curled fox and crescent branch

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0163 | Sylvan

Wall art

Nine-trunk forest composition

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0164 | Tidepool

Wall art

Shell and ripple basin

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0165 | Mariposa

Wall art

Five-butterfly ascent

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0166 | Heron

Wall art

Heron, reeds and sun

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0167 | Aerial

Wall art

Topographic river landscape

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0168 | Nocturne

Wall art

Crescent with orbiting moths

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0169 | Pollen

Wall art

Dandelion seed movement

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0170 | Lark

Wall art

Bird crossing carved wind lines

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0171 | Fern

Wall art

Unfurling diagonal fern fronds

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0172 | Canthara

Wall art

Overlapping vessel-like curves

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0173 | Eos

Wall art

Rising disc and layered horizons

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0174 | Monsoon

Wall art

Rain arcs over carved cloud forms

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0175 | Mycelia

Wall art

Branching organic line network

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0176 | Alba

Wall art

Oversized opening floral relief

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0177 | Reverie

Wall art

Floating forms and contour lines

Dimensions: 8 ft × 4 ft

Face / panel thickness: 18-100 mm relief

Material: 18 mm MDF, laminated thicker for deep relief

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0290 | Leaf Border Mirror Frame

Mirror frames

A rectangular frame is surrounded by densely layered leaf carving and rounded ornamental edges.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0294 | Cascading Floral Wall Art

Wall art

Flowers and curling stems gather along one side, leaving an open field beside the botanical composition.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0295 | Round Floral Medallion

Wall art

A central flower is surrounded by scrollwork and concentric borders in a circular decorative relief.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0296 | Hexagon Pattern Wall Art

Wall art

A chain of hexagonal tiles combines several line patterns and colours across a tall rectangular background.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0297 | Leaf Dome Post Cap

Post caps

Broad carved leaf forms cover a rounded cap above a stepped square plinth.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0298 | Vase Form Post Cap

Post caps

An urn-like upper form carries pointed leaf decoration above a patterned circular base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0299 | Architectural Square Post Cap

Post caps

An angular cap combines an overhanging top, arched side details and a stepped square base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0300 | Spiral Ball Post Cap

Post caps

Curved diagonal grooves wrap around a spherical finial above a rounded base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0301 | Ribbed Dome Post Cap

Post caps

Deep vertical ribs give the domed top a segmented appearance over a square moulded base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0302 | Leaf Bud Post Cap

Post caps

A rounded bud-like crown with leaf carving rises above a short fluted circular base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0303 | Floral Cube Post Cap

Post caps

A small rounded finial tops a square body with flower reliefs on its visible faces.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0304 | Layered Petal Post Cap

Post caps

Rows of overlapping petal shapes cover a rounded crown above a turned circular base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0305 | Fluted Urn Post Cap

Post caps

A small top finial, broad rim and fluted bowl-like body form a compact ornamental cap.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0306 | Diamond Pattern Post Cap

Post caps

A patterned rounded body with diamond-shaped details supports a small ribbed upper crown.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

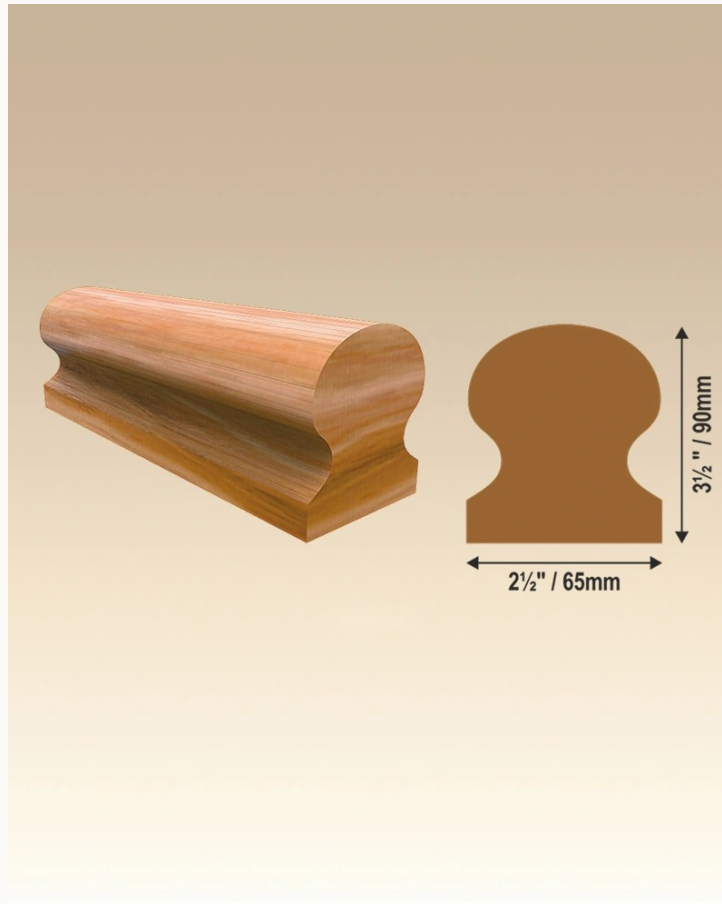

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0307 | Rounded Crown Handrail

### Handrails

The illustrated rail profile has a rounded upper grip and shaped shoulders above a narrower base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

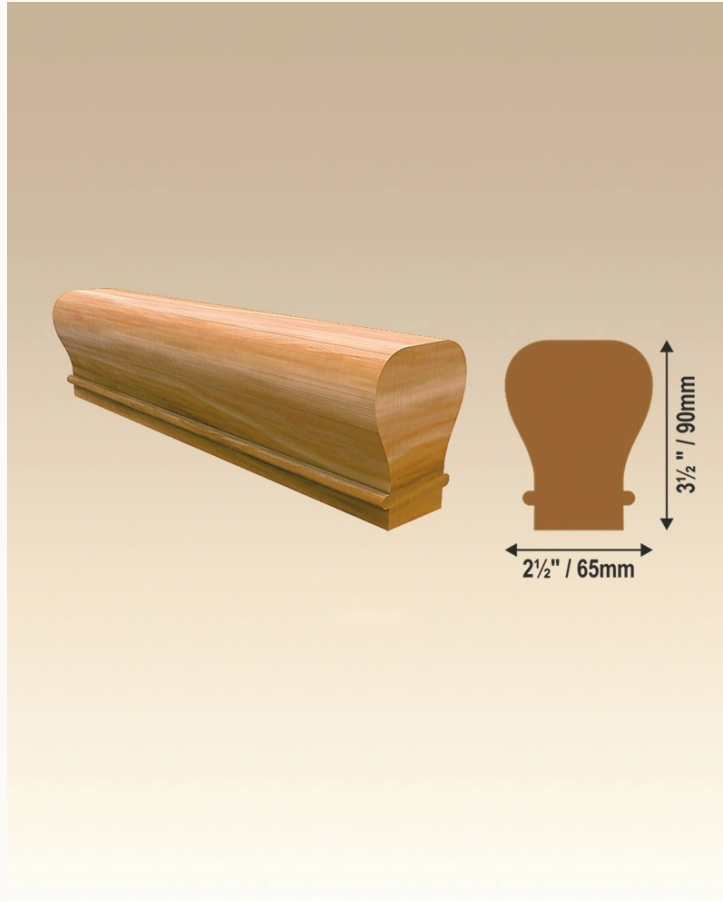

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0308 | Waisted Handrail Profile

Handrails

A softly curved grip narrows through the sides before meeting a flat-bottomed base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

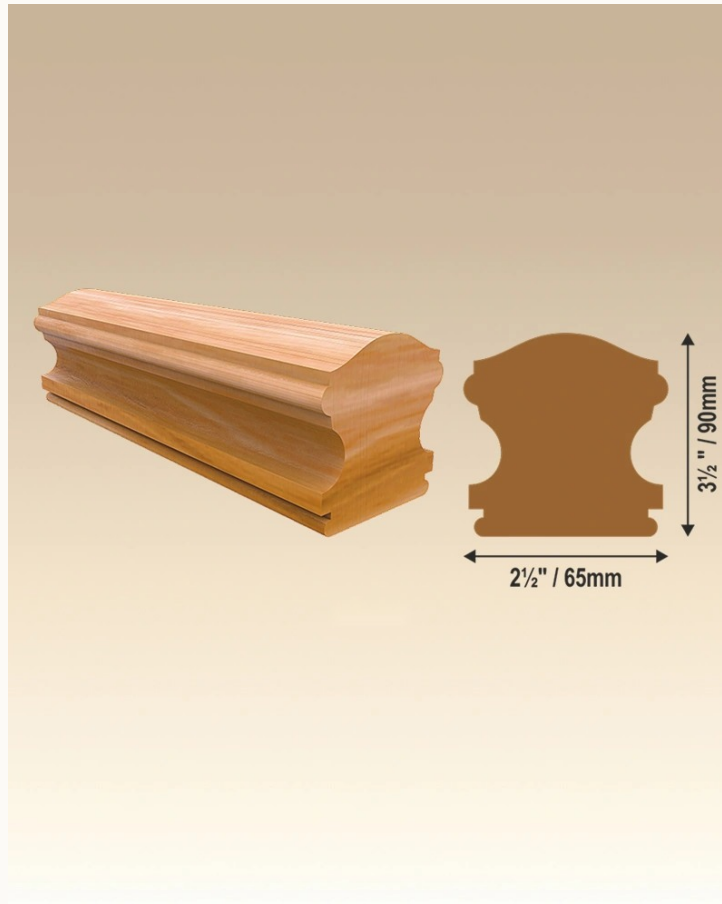

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0309 | Stepped Shoulder Handrail

Handrails

A rounded upper grip is combined with projecting shoulders and layered lower mouldings.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

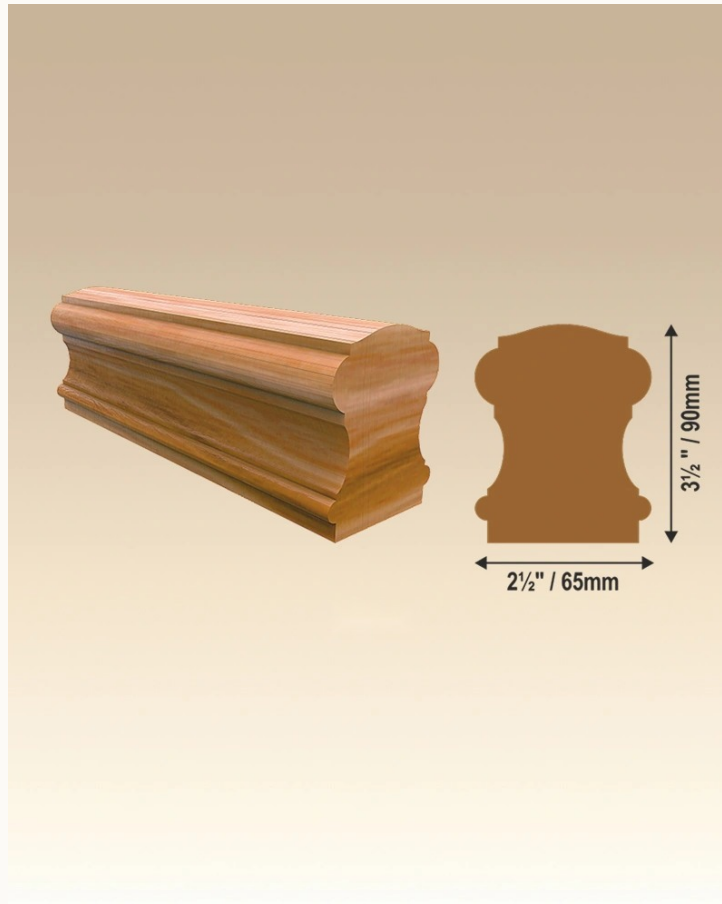

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0310 | Broad Crown Handrail

### Handrails

A broad rounded top sits above defined side shoulders and a stepped lower edge.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

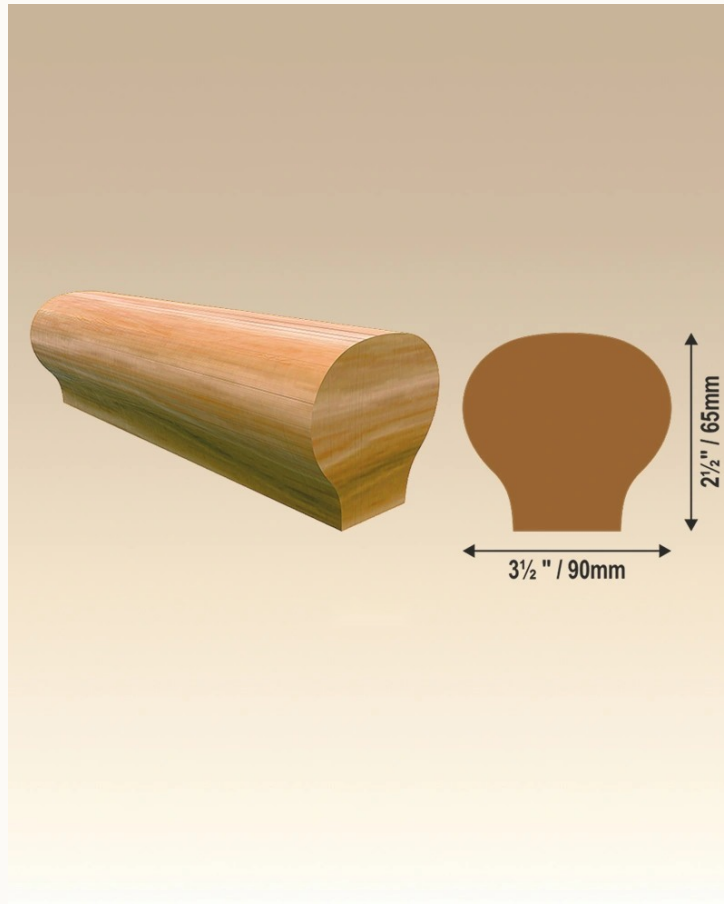

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0311 | Oval Grip Handrail

Handrails

A full oval-shaped grip transitions into a narrower flat-bottomed lower section.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

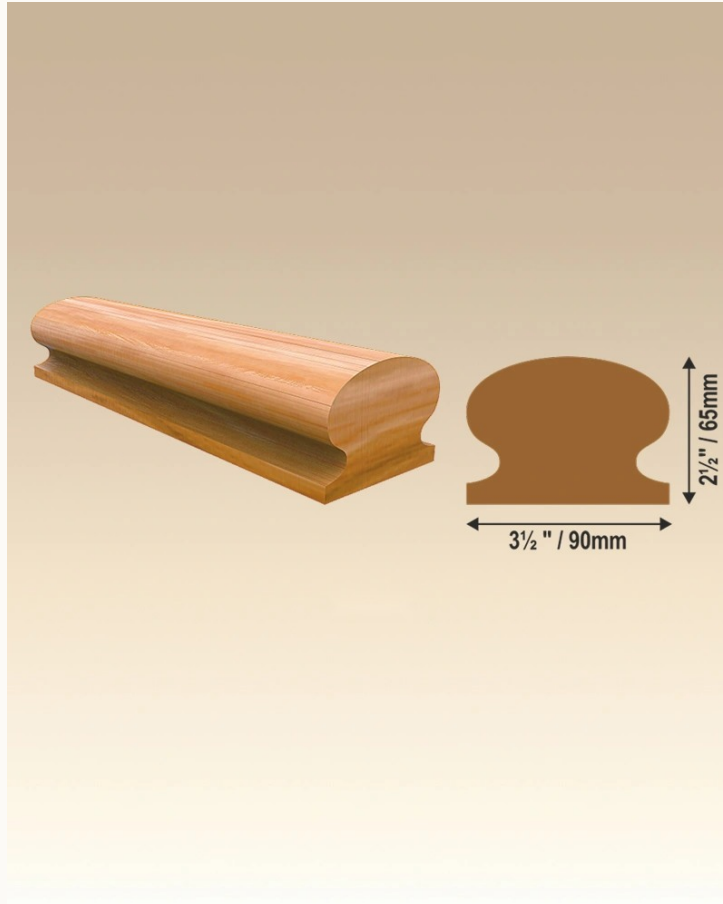

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0312 | Low Rounded Handrail

### Handrails

A low, broad rounded grip sits above a short shaped base for a compact profile.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

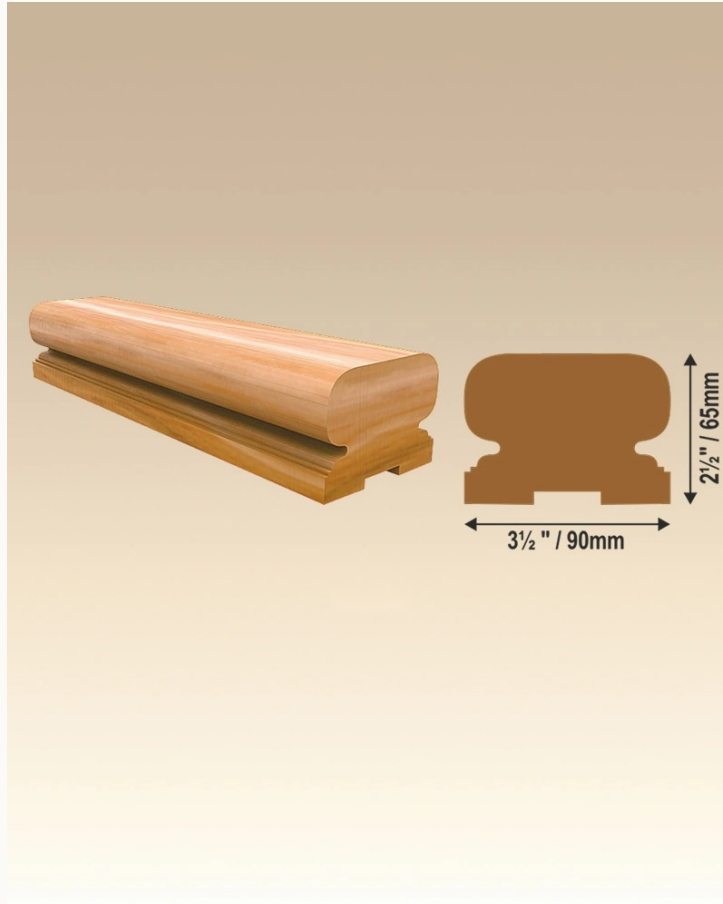

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0313 | Flat Crown Handrail

### Handrails

A flatter upper grip with rounded corners sits over a recessed waist and broad foot.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0314 | Turned Bead Baluster

Balusters & newels

Rounded turned sections alternate with narrow collars between square end blocks.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0315 | Fluted Centre Baluster

Balusters & newels

A tapered, vertically detailed centre is framed by rounded turned sections and collars.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0316 | Scroll Carved Baluster

Balusters & newels

A tall scrolling relief decorates the central shaft between plain square ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0317 | Twisted Shaft Baluster

Balusters & newels

A gently twisted central section is balanced by turned collars and square fixing ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0318 | Diamond Carved Baluster

Balusters & newels

A repeating diamond-like texture runs down the long central shaft.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0319 | Fine Fluted Baluster

Balusters & newels

A slender fluted shaft is bounded by ornamental turned collars and square ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0320 | Ornate Vine Baluster

Balusters & newels

Flowing vine-like carving extends through the centre with rounded ornamental transitions.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0321 | Beaded Turned Baluster

Balusters & newels

A succession of rounded beads and shaped collars creates a strongly articulated turned profile.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0322 | Slim Spindle Baluster

Balusters & newels

A long, slender spindle tapers between compact turned details at the top and bottom.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0323 | Scroll Column Baluster

Balusters & newels

A mostly cylindrical shaft carries a restrained scrolling motif between ringed collars.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0324 | Leaf Carved Baluster

Balusters & newels

Small repeating leaf-like details cover a rounded central shaft with turned ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0325 | Waisted Reed Baluster

Balusters & newels

Two tapered ribbed sections meet at a carved central collar for a symmetrical profile.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0326 | Braided Baluster

Balusters & newels

A plait-like diagonal pattern wraps the central shaft between square end blocks.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0327 | Fine Lattice Baluster

Balusters & newels

A closely repeated lattice texture covers a straight narrow shaft.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0328 | Stacked Bead Baluster

Balusters & newels

A dense sequence of projecting rounded details runs along the central column.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0329 | Ringed Baluster

Balusters & newels

Closely spaced horizontal rings create a regular texture along a straight shaft.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0330 | Chevron Inset Baluster

Balusters & newels

A central chevron-patterned strip is framed by square ornamental blocks and straight end sections.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0331 | Figural Carved Baluster

Balusters & newels

A sculptural figure-like motif forms the central detail between substantial square ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0332 | Open Scroll Baluster

Balusters & newels

Large flowing scroll shapes and recessed openings form an elaborate central section.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0333 | Greek Key Baluster

Balusters & newels

A straight rectangular shaft carries a continuous geometric key pattern within a slim border.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0334 | Ball Top Lattice Newel

Balusters & newels

A round finial tops a square block and a long diamond-patterned shaft.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0335 | Ball Top Scroll Newel

Balusters & newels

A spherical finial and upper block sit above a tall scroll-carved centre.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0336 | Ball Top Panel Newel

Balusters & newels

A rounded finial crowns a square post with a restrained repeating rectangular pattern.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

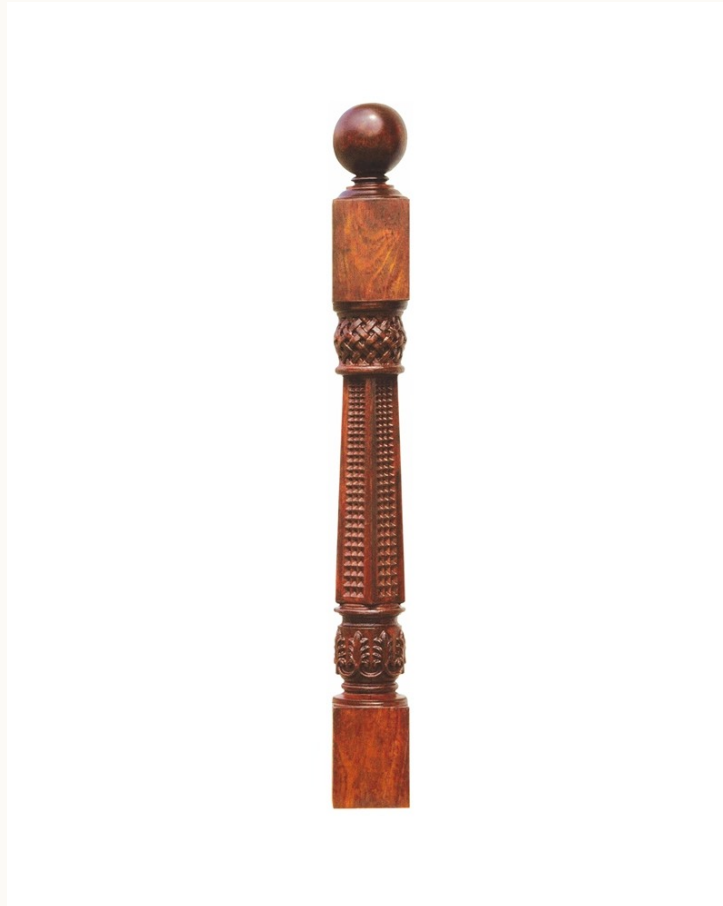

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0337 | Ball Top Fluted Newel

Balusters & newels

A small spherical top and decorative collars lead into a tapered fluted shaft.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

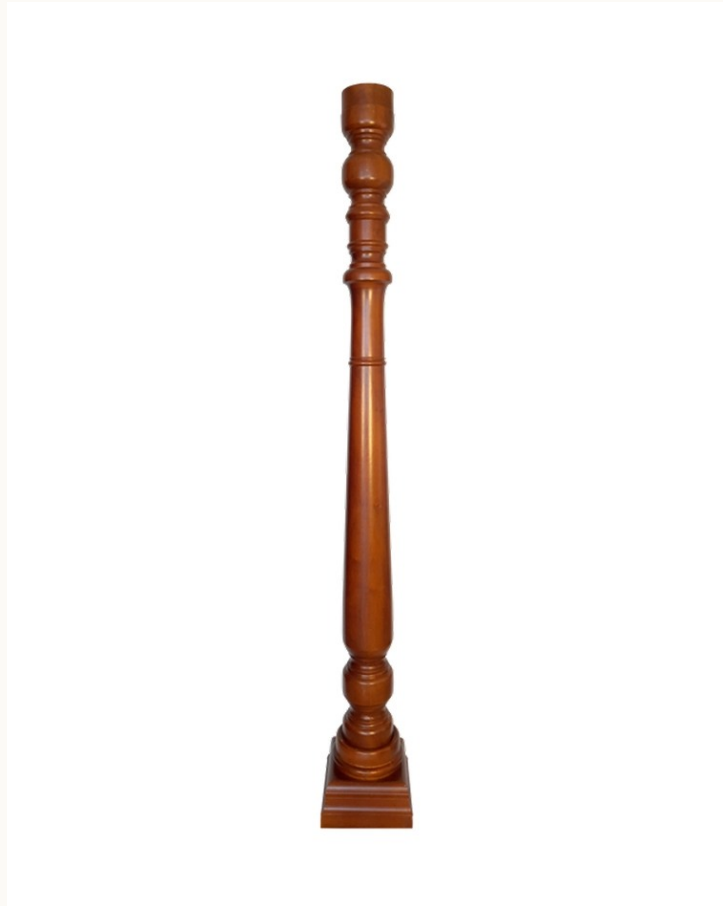

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0338 | Slender Turned Pillar

Antique pillars

A long restrained shaft is framed by turned rings and a stepped lower base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0339 | Fluted Heritage Pillar

Antique pillars

A vertically fluted shaft is capped by dense ornamental bands and a shaped base.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0340 | Spiral Heritage Pillar

Antique pillars

A gently twisting surface extends along the slender shaft above a dark stepped foot.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0341 | Leaf Spiral Heritage Pillar

Antique pillars

A broad spiral of leaf-like carving winds around the column between detailed end bands.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0342 | Plain Ringed Pillar

Antique pillars

A smooth cylindrical body is divided by simple ringed collars near the top, centre and bottom.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0343 | All-Over Carved Pillar

Antique pillars

Dense small-scale carving covers the full shaft, creating a continuous ornamental texture.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0344 | Swept Spiral Pillar

Antique pillars

Long sweeping diagonal grooves wrap around the shaft with carved accents at its ends.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0345 | Tapered Decorative Post

Decorative posts

Elongated shaped sections and rounded turned collars create a slender ornamental post.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0346 | Fluted Decorative Post

Decorative posts

A fine fluted upper shaft transitions through rounded and stepped turned sections below.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0347 | Emblem Block Decorative Post

Decorative posts

Square ornamental end blocks frame a narrow shaft with long linear detailing.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0348 | Stacked Bead Decorative Post

Decorative posts

A vertical sequence of rounded bead-like sections creates a simple repeated silhouette.

Dimensions: To be confirmed — provide required width and height

Face / panel thickness: Confirmed with the approved design

Material: Selected and confirmed in the quotation

Finish: Selected and confirmed in the quotation

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0051 | Prism

Modular panels

Timber block modular wall

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0052 | Cubic

Modular panels

Soft cube modular panels

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0053 | Swell

Modular panels

Flowing wave wall panels

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0054 | Facet

Modular panels

Folded geometric panels

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0055 | Contour

Modular panels

Repeating dimensional tiles

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0056 | Petal

Modular panels

Four-petal modular tile

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0057 | Quadra

Modular panels

Four-diamond cushion module

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0058 | Fold

Modular panels

Alternating origami planes

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0059 | Pebble

Modular panels

Irregular rounded pebble modules

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0060 | Nexus

Modular panels

Raised four-way junction pattern

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0178 | Hive

Modular panels

Graduated honeycomb cells

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0179 | Scale

Modular panels

Offset overlapping scales

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0180 | Rondo

Modular panels

Connected circular bosses

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0181 | Arrow

Modular panels

Alternating interlocking chevrons

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0182 | Pinwheel

Modular panels

Four-blade rotating module

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0183 | Basket

Modular panels

Over-under woven strips

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0184 | Triax

Modular panels

Three-arm star network

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

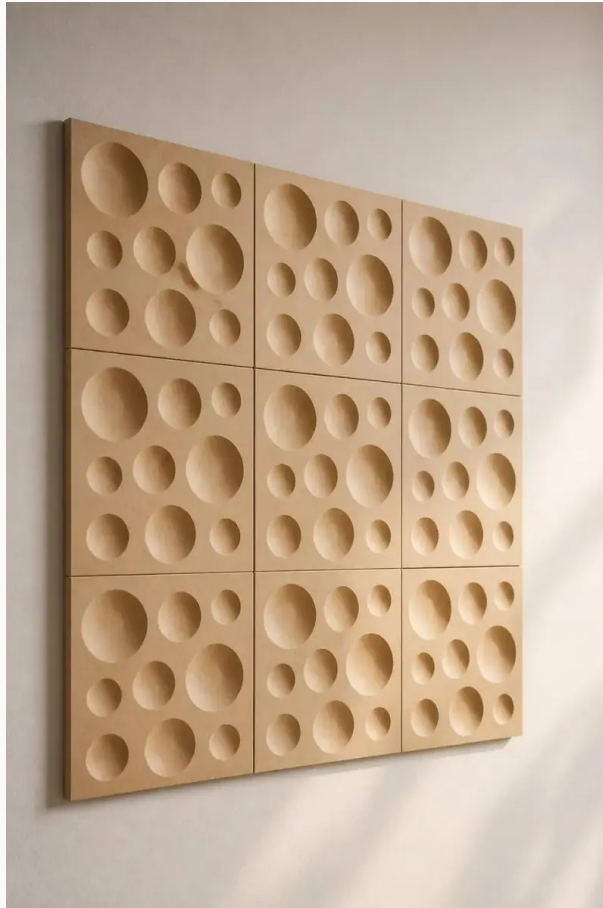

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0185 | Dimple

Modular panels

Graduated concave bowls

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0186 | Ridge

Modular panels

Shifted diagonal ridges

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

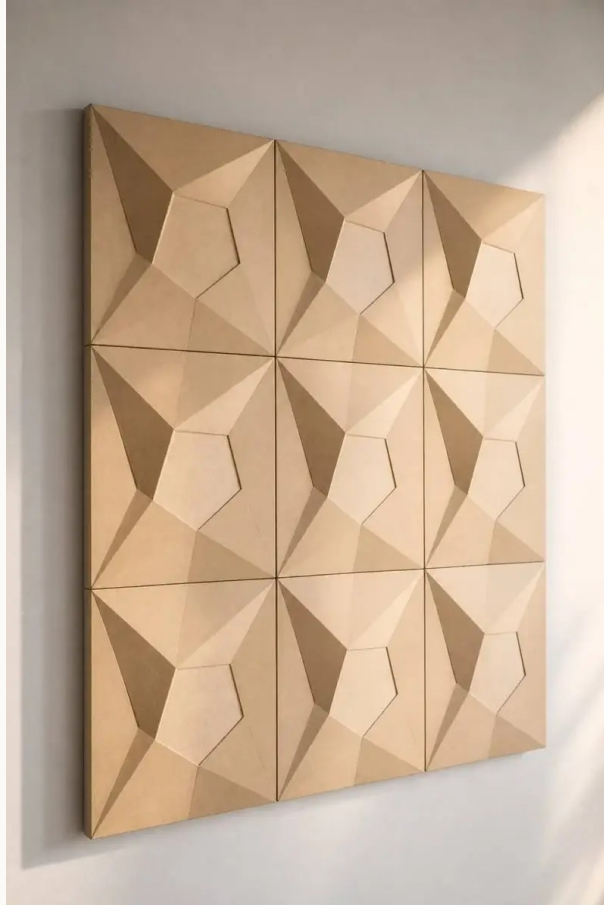

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0187 | Hexfold

Modular panels

Six-plane folded hexagon

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0188 | Wavelet

Modular panels

Connected shallow S-waves

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0189 | Capsule

Modular panels

Four-capsule cross module

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0190 | Kite

Modular panels

Raised and recessed kites

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0191 | Link

Modular panels

Alternating interlocking ovals

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0192 | Rosette

Modular panels

Six-petal star module

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0193 | Lozenge

Modular panels

Elongated diamond cushion repeat

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0194 | Origami

Modular panels

Alternating folded triangular planes

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0195 | Penta

Modular panels

Faceted pentagonal tile system

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0196 | Scallop

Modular panels

Overlapping pressed fan shapes

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0197 | Braille

Modular panels

Abstract rounded stud grid

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0198 | Chisel

Modular panels

Diagonal cuts and broad planes

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0199 | Warp

Modular panels

Raised woven band surface

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.

## IB-0200 | Geode

Modular panels

Faceted irregular polygon repeat

Dimensions: 500 × 500 mm

Face / panel thickness: 0.9 mm base / up to 21 mm emboss

Material: pre-coated PVC composite tile, pressed not carved

Finish: Customer-selected colour / stain / polish

Ordering: Share the product code and required size. Final construction and CNC machining details are confirmed after design and material approval.
